

# Stylized RPG Character Pack – Chibi Fantasy Heroes

Bring your fantasy game to life with this charming set of stylized chibi characters — perfect for RPGs, adventure games, or mobile projects!

## What's Included:

### 4 Fully Rigged 3D Characters (FBX format):

-  **Flint Emberon** – Fire Mage Boy
-  **Lyra Moonshade** – Wizard Girl
-  **Kai Greenleaf** – Scout / Explorer
-  **Rin Shirobane** – White Ninja

✓ High-quality textures: **PNG format (2048x2048)**

✓ Optimized topology & clean UVs

✓ Game-ready: Tested in **Blender**, compatible with **Unity & Mixamo**

✓ Rigged with **ActorCore AccuRIG**

✓ Supports **URP** and **HDRP**

⚠ No animations included – easily add your own or use **Mixamo**

## Easy to Use:

1. Import any FBX character into your Unity project.
2. Drag the prefab into your scene.

3. Apply Mixamo or custom animations — characters are rigged and ready!
4. Materials and textures auto-assign on import.

## File Types:

- .FBX (characters)
- .PNG (textures)
- Unity Demo Scene (URP)
- ReadMe / Setup Guide (.PDF)

## Notes:

 *The character models may have slight deviations in their initial FBX import rotation. However, this does not affect their usability — all models face forward in-scene, work well with Mixamo animations, and are ready for drag-and-drop use in Unity.*
